Leyparts Brake Linings

- Top priority given to safety while ensuring the performance factors required of brake linings.
- Only top graded materials are used to make the linings reliable.
- These brake linings have been developed after repetitive exhaustive experiments on the basis of various operational conditions experienced in the past.
- Rigorous testing ensures that the highest standards are met in raw material selection, mixing quality, and all other areas of the manufacturing process.
- Dynamometer testing of the finished product simulates a variety of braking conditions, proving prescribed design criteria for fade, recovery, noise, life, mating surface wear and stopping distance.
