Leyparts Gears & Shafts

- Gears are hobbled to increased depths to eliminate stress concentration.
- Gear tooth flanks are ground using highly sophisticated gear grinder to remove distortion.
- Heat treatment in a continuous gas carburising furnace gives it a uniform hard case and strength to withstand torsional stress.
- Gears undergo 100% magnetic crack detection checks.
- Ground gears assure high transmission accuracy and comply with grade 1 quality.
- Dimensional conformance assures smooth engagements.
